Please attend this clinic with your child, as you will be asked to complete the informed consent form upon arrival.

Receiving the vaccine helps prevent or reduce the risk of severe COVID-19 disease, both for the person immunized and for others. Even if you are not at high risk of severe disease from COVID-19, it is important to think of your friends, family and other community members you can help protect. It is much safer to get the vaccine than to get the disease.

Stay well, stay safe and let's all do our part to protect our community!

Thank you.
